USC Online Graduate Application Summary

APPLICATION INFORMATION: Program of Study

Fall 2015	USC International Academy	1547	International Academy - Pre-Masters Program
Term	College/School	POST/Program	

Dual degree program interest: Applying to an online education program? Yes ☐ No ☑

Applying for full or part-time enrollment? **Full-time**   Applying to a Viterbi Distance Education Network program? Yes ☐ No ☑

Not applicable

Fee Waiver Type (If requested, subject to the approval of USC Office of Admission)   Off-campus site (if applicable)

If previously applied to USC, indicate the following:

Term/Year: **Fall** **2015** School/College: **Engineering** Undergraduate/Graduate: **Graduate**

USC Online Graduate Application Summary

INTERNATIONAL APPLICANTS ONLY

General Information

Are you applying to an online program that does NOT require travel to the U.S.? Yes ☐ No ☑ Not Applicable ☐

International Applicant's Confirmation: I confirm that the information in the Biographical Section of this application - Legal first and last name, date of birth, county of birth and county of citizenship - matches exactly my information as it is listed on my passport. I understand that this information will be used to issue my I-20 or DS-2019 form, and that failure to provide complete and accurate information may severely delay the processing of my application. Do you confirm this statement? Yes ☑ No ☐

If you currently reside outside the United States you will need an I-20 or DS-2019 form to apply for your F-1 or J-1 visa at a U.S. embassy/consulate. Select the type of visa expected: **Student F-1 Visa**

Do you currently live in the United States? Yes ☐ No ☑

    a. Please select your current visa status: _____

    b. If you indicated a visa in 3a that is something other than F-1 or J-1, then please choose one of the following:

        ☐ I will apply for an F-1 visa outside the United States

        ☐ I will apply for F-1 status within the United States

        ☐ I will remain on my current visa for studies at USC.

IF YOU ARE CURRENTLY ON AN F-1 OR J-1 STATUS:

Student and Exchange Visitor Information System (SEVIS) ID: _____

Educational institution that issued your current I-20 or DS-2019 (list USC, if applicable):

_____

Are you currently participating in Optional Practical Training (OPT)? Yes ☐ No ☐

When does your Optional Practical Training Expire? _____ / _____

Expected SEVIS Transfer Release Date (Month/Year): _____ / _____

If you indicated that you have a J-1 visa, are you a student or a scholar? _____

Dependent Information

Are you bringing family members with you? Yes ☐ No ☑

DEPENDENT #1   Last/Family: _____ First: _____

☐ Spouse ☐ Child Gender: _____ Date of Birth (MM/DD/YYYY): _____ / _____ / _____

City of Birth: _____

Country of Birth: _____ Country of Citizenship: _____

DEPENDENT #2   Last/Family: _____ First: _____

☐ Spouse ☐ Child Gender: _____ Date of Birth (MM/DD/YYYY): _____ / _____ / _____

City of Birth: _____

Country of Birth: _____ Country of Citizenship: _____

Experience

Level Designer
User Experience Designer
Web Server Administrator

March 2015 - Present

Fangtsun Games

Responsible for creation of game levels from game stories and concepts; optimization of user experience by re-designing and tuning gameplay. Also responsible for developing and managing company website.

Backend/Software Developer

November 2014 - January 2015

TillerDigital Inc.(Tac Marketing Inc.)

Responsible for developing and troubleshooting websites and web services, and managing customized CMS databases.

Undergraduate T. A.

June 2011 - September 2011

George mason University

Responsible for assisting young computer science students with programming difficulties.

Lead Program
Lead Design
Producer

February 2013 - May 2013

Run Eason Run!

Designed and prototyped the game story and the gameplay, polished and published the complete version of the game with the assistance of two other team members.

Front-end Development
Back-end Development
Test/Troubleshoot

January 2014 - February 2014

Community Social Event Feed Site

Co-designed and developed the back-end server structure and database, optimized the database with functional dependencies for potential large-scale uses. Also created the front-end jQuery APIs for future efficient development and management.

Hanzhang Chen

Statement of Purpose

When my family bought me the first computer 17 years ago, I was deeply attracted to this very original machine that it companied me throughout my childhood, letting my toy guns covered with thick dusts. My real first taste of the unforgettable joyfulness began in a computer class at elementary school. Our teacher installed a video game in all the machines without informing everyone. When other classmates were only able to follow instructions and type in alphabets, I had already searched the MS-DOS system and played the hidden game. This special skill earned me respects from the classmates and great satisfactions, which inspired my passion to computers.

As time passed on, I was enrolled to the best high school in our city. With my ascending interests in mathematics and computer technologies, I joined the Olympiad informatics contest team and for the first time, I had access to the systematic computer programming learning process. During the three years, I earned the prizes for the National Olympiad in Informatics, province (NOIp) contests three times, which enhanced my interests and strengthened my will of choosing this field as my career path. More importantly, I learned from the training that there are thousands of students like us overseas, preparing for another event called ACM/ICPC, especially the United States. From them I was informed that they have much more resources in computer science and a better suitable environment for study and research. This idea helped me made a life-changing decision to study abroad.

I still remember August, 22nd, 2011. It was the first day I landed on Washington DC. I was excited about my new journey at George Mason University. But soon, I realized that because college education systems and methodologies are dramatically different between China and the U.S., students should manage everything independently, meaning that it is important to balance life and study. At first, I had a hard time figuring out the best schedule for course selection and various deadlines for school activities, which gave me a tough time and a poor academic performance. To overcome this hassle and to better adapt to the new learning environment, I designed and developed a software application to automatically generate all possible class-scheduling solutions based on customized user preferences, such as not to take morning classes or condense all the classes into 4 days. To begin with, I created two web crawler programs, one for gathering data related to George Mason University instructors from ratemyprofessors.com, the other for collecting course data from the university website, and yielded useful information by analyzing the DOM trees from the data collected. Then I adopted an evaluation algorithm from previously collected information to calculate the value of a specific timesheet based on the preferences given by the "users", and run a simple searching algorithm with a few pruning strategies to generate the top schedules. Even though I did not release my work to public for university network security reasons and intellectual property limitations, I adapted theoretical knowledge learned from classes to application to find solutions to my own problem and I enjoyed

the whole process of solving problems. This encounter-solve process walked me through the 2 and a half years in America and as a result it earned me Dean's List 2013 awards.

Upon my graduation at George Mason University, the office of international programs and service sent an invitation to my parents. As much as they are thrilled to visit my campus and the United States, they were unable to speak English and they had to deal with the challenge of flight transitions. With this in mind, I decided to start a new web service that would help people who are traveling worldwide, but not good at English. The web service was designed to provide a platform so that users can post their travel information including itinerary and final destination to other passengers or airport employees who can offer help. This service also helps users to identify passengers to the same destination on a same flight or passengers willing to escort small pets or objects overseas. Just like Airbnb, this application will provide a new channel for people to help each other and potentially increase people's social connection.

So far, I have not been able to make this project a practical application. Due to the nature of this application, we need to store and manipulate large amount of data, such as saving users' behavior history and analyzing statuses of the users so that they can be fed with the most useful information; or dealing with the bandwidth and other system performance problems. These require the ability to create magnificent systems, manage large databases, and there will be more to do. I would dream that one day the USC data science program would help me to finish up my projects. More importantly, USC attracts me due to its great environment where students from different areas of study and cultures can work together easily. I happened to know one of the USC interactive media alumni, Jenova Chen for a long time because he is now a one-of-a-kind game producer in China. While at USC, he teamed up his fellow student Kellee Santiago, who made an inspiring speech on the TEDxUSC event about how video games can be artistic, to start a game design company and made great achievements in that field. I regard this as an excellent gift from USC because it is there, no matter who you are or where you are from, as long as you have great ideas and dreams, you may find that your dream come true.

Regarding my future plan. I would like to become an industry expert to bring people convenience in daily life with data-centric technologies, which requires me to be a leader of a group of talented people to make it happen. I used to be uncertain of how to approach this goal, until I saw the Master of Computer Science program with a focus on data science at Viterbi School of Engineering, USC. After carefully reading every word on the website, I believe that this is where I should go, given what I had done and what my passion is for – programming, algorithm designing, data management, software performance optimization, and leadership. With 8 years of preparation in computer science, I am confident that I will bring abundant resources to university's academic and cultural communications, and devote my contribution to the development of burgeoning technologies.

教务长：	Dean：	西南交通大学教务处 中华人民共和国 Dean's Office (Seal) Southwest Jiaotong University P.R.CHINA

学 士 学 位 证 书

陈汉章 ，男 ，1990 年 8 月13日生。在 西南交通大学

计算机科学与技术 专业完成了本科学习计划，业已

毕业，经审核符合《中华人民共和国学位条例》的规定，授予 工学

学士学位。

校长

西南交通大学

学位评定委员会主席

证书编号：1061342014008025

二〇一四 年 七 月 一 日

（普通高等教育本科毕业生）
